

REMOTE CONTROLS
WITH FLEXIBLE CABLES

TC

TC

TC-TCC

Features

This catalog shows TC and TCC remote controls with flexible cables for directional control valves.

H Monoblock body TC or stackable TCC.

H Low actioning efforts.

H Easy installation.

H Detents, safety lever, several types of knob available.

H Two sizes available: TC5 recommended for SD4, SD5, SD6, SDM080 and DF5 valves; TC10 recommended for other valves.

Additional information

This catalog shows the product in the most standard configurations.

Please contact Customer Service Dpt. for more detailed information or special request.

WARNING!

All specifications of this catalog refer to the standard product at this date.

Walvoil, oriented to a continuous improvement, reserves the right to discontinue, modify or revise the specifications, without notice.

WALVOIL IS NOT RESPONSIBLE FOR ANY DAMAGE CAUSED BY AN
INCORRECT USE OF THE PRODUCT.

4th edition May 2000:

This edition supercedes all prior documents.

TC-TCC

Controls

M controls

Spring centered to neutral.

T controls

Without spring return for detented controls on directional valve and control without neutral position.

U controls (TCC5 only)

With 3 detented positions (only to be used as first or last sections).

Technical data

Maximum admissible traction load	1450 N	340 lb
Maximum admissible compression load	880 N	200 lb
Minimum recommended bend radius	R = 150 mm	5.9 in
Working temperature	from -40 to 80 °C	-40B176° F
Maximum recommended length	4000 mm	157.48 in

CG cable

Flexible cable with both turning ends.

Yellow galvanized turning end

CD cable

Flexible cable with one fixing end and one turning end (see CG cable).

Yellow galvanized fixing end

Connecting scheme

Flexible cables and connecting kit at both ends are used to join control group, TC or TCC, to the directional control valve.
 On the remote control there is always a GP kit; on the valve, kit type depends on the cable.
 TP kit is used with CG cable with turning ends; TQ is a waterproof kit used with the fixing end of CD cable.
 CP kit must be used instead of TP kit when TL control is mounted on the valve, with the lever on the opposite side.
